ADVENTURE SURVIVAL TRAINING

Your Adventure Survival Starts Here!

Adventures
are US LTD.™
The Adventure Specialists

CARBON NEUTRAL Environmentally friendly fun!

Book 'Adventure Survival Training' with in schools and youth centres for ages 6 years and upwards. For the past 18 years our company has been a market leader providing multi activity outdoor education and team building programmes within our region.

Go Survival is a brand new team building concept from Adventures Are Us. It was launched a few years ago and has developed significantly ever since. Welcome to our latest exciting adventure area GO Survival book adventure survival workshops either in school times as part of an educational programme or for after school clubs as a fun and exciting new challenge.

We tailor make our workshops to slot into key educational topics being taught within schools aligning them with key learning outcomes, personal achievement certificates and with a strong 80/20 format of experience, that being 80 percent doing and only 20 percent talking about the delivery subject.

Making our workshops fun, affordable and very high valued for ages 6 years and upwards, they can be pupil led, teacher led or instructor led with our own team allowing team building skills to be developed on-site within your own school grounds, on the grass, in the woods or the classroom.

Pupils will be engaged, challenged and put through their paces learning a wide range of survival skills, which will be demonstrated, practiced then passed on pupil to pupil as a mentoring tool, this will build self-esteem, confidence, leadership skills and communication amongst their peers.

Client Users

LEA Councils & Youth Services, After School Clubs, All Schools – Primary, Junior & Comprehensives, Private & Residential Schools – Boarders, Prep Schools, Scouts, Cubs, Guides, Sea Cadets, Army Cadets, Uniformed Services, Youth Inclusion Teams, Higher Education Colleges, Further Education Colleges, & all other youth based organisations.

The Adventure Mission

We offer a perfect high value alternative to outdoor education that heavily relies on transport hire and further fuel usage to bring children to the venues hence a higher carbon footprint for those clients.

The Adventure Aims

Go Survival brings the adventure to you, into school/parks within walking distances, with zero environmental impact and its benefit of being carbon neutral and green

Our Adventure Solutions

We arrive within your school or youth centre with our 'Adventure Van' full of team building equipment ready to setup the challenges and survival tasks, either on the grass, woodland area or classroom if we encounter poor weather.

GO SURVIVAL Skill Development

- Leadership ■ Cooperation ■ Communication
- Problem Solving ■ Responsibility ■ Motivation
- Self Esteem ■ Confidence ■ Numeracy
- Performance ■ Trusting ■ Tolerance
- Initiative ■ Team Work ■ Organisation
- Community Spirit ■ Safety & Helping
- Acceptance ■ Diversity ■ Listening

Go Survival Multi Purpose Delivery Targets

We save schools/youth service a massive transport cost by bringing the adventure direct into the school grounds or urban areas. Half of any outdoor education cost is the transport hire charges, you do not pay any, or pollute the environment.

This makes our concept cheaper, cleaner, easier and faster all at the same time. We can deliver to 60 children in one event by rotating them around.

We provide free fruit to the children at our events to encourage **five a day**.

We are actively promoting **healthy exercise** and reducing Obesity.

We integrate a strong **educational message** into our delivery plans.

We perform a safe litter pick before and after the event on that site.

We integrate **community initiatives** like Anti Social Behaviour, crime reduction strategies, we teach the children to respect property and the woodland areas.

We will **tackle issues** and topics that compliment delivery through school curriculum whilst they're engaged within the activity, like gender equality, equal opportunities and bullying.

We will develop children's personal skills base, core skill areas and build team work, stewardship and citizenship.

Adventure Environment

We utilise any open grass or woodlands on your school or youth centre site or even woodland that are close to your base or the outdoor classroom. This is a perfect nature and adventure education package, it will deliver multi level targets for schools and LEA curriculums and provide healthy exercise and a creative learning environment for children aged 6 years and upwards.

Go Survival™

Adventure Survival Training

Here is a brief adventure survival description with photographs as a simple menu, it does depend on your school or youth centres open grass area as to which survival challenges can be operated on your site, most of them can be.

Go Shelter

A team challenge constructing your very own high tech survival shelter using our own equipment brought in, you will have a selected team, a time limit and rewards and penalties for slow, or failure, this is a fun team challenge using ropes, knots, sheets and pegs to fix it down, it will develop delegations skills, cooperation and communication skills. Will your shelter survive our water storm at the end. Add another school team for a 'Shelter Race' for a prize.

Go Hunter

As a small hunter gatherer survival team you will have to learn to make bush traps, set snares and make a stick shelter to use for protection against the wild weather, the skills used are learning knots, using cords of rope, communication, listening, leadership and time skills. Will you survive as a new hunter.

Go Fire Starter

Can your team locate tinder, kindling and create a small controlled fire in a pot, using a flint and starter to survive the cold harsh winter nights in the wild countryside. A demonstration will be provided with close supervision so all hazards and risks are controlled by our staff, safety comes first. This powerful skill will save your life, cook your food and ward off predators. If each child can achieve this skill you become a seasoned survivor and progress to pack leaders. Can you cook a marsh mellow for food before your fire burns out?

Go Navigator

Can you and your team use a map, compass, ruler, magnify lens, and a few maths skills to navigate around your school grounds, using North, East, South and West can you make a navigation puzzle and write it out. You will swap puzzles with the other half of the group and try and complete each other's chart. We estimate distances use percentages, coordinates and angles to follow the puzzle. Will you get lost and eaten by wild animals, or find sanctuary in your shelter before dark.

Rescue or Distress

Can you and your team make rescue signals on the ground using our equipment we bring in, spelling SOS in stones, clothes, sticks, pebbles or in mud, paint or in wood chippings. Can it be viewed by a passing plane or helicopter that is searching for you and what other signals can be made to attract attention to be found what about sound, smell, people and lights.

Go EVAC

A team member in your group is injured and cannot walk back to your shelter and its going dark can you build a basic carrying stretcher as a team and transport them back to your dwelling. Using our materials, sheets, ropes, cords, rut sacks, and your team power can you lift them and move them 50 metres to safety in time.

Go First Aid

Some of your team members have been hurt in the wild mountains they have severe bleeds, broken arms, legs, cuts, head injuries and some have fainted in pain and are suffering from exposure to the elements. Can you use our first aid kits supplied to restore life and immobilise the casualties to help them survive.

Water of Life

Can you create water as a team using a small dug pit, some stones, a sheet and a cup, creating a solar still using evaporation of earth's warmer temperature and the cool air and sun shining down on the plastic sheet. This requires an area where a small hole can be dug and used then filled in afterwards, this is science at its best. Equipment will be provided by AAU.

Flying Fox

Can your team construct an aerial pulley system between two trees or posts to send supplies across over the swamp bog lands, you can divide into two teams one at each side of the course and bogs, then you need to work together to build it. A knot skills session will be taught so you have the skills ready for your challenge then send over a variety of survival tools without dropping them

Go Survivor

Your team are lost and are in need of rescuing we have hidden a variety of survival equipment in your school grounds your team needs to recover this equipment by means of a treasure map that we provide. You then select at random our survival cards and complete the tasks set out on them.

Go Moonlight

You and your team members are exposed in the wilderness and its dark, you have a chest of survival equipment but you cannot open it until you earn your points first with a simple survival quiz from AAU. Then you access the chest and follow the survival instructions inside, using torches, building a shelter and making a hot chocolate drink using a stove.

Go Wild

This survival challenge is a night adventure in your school or youth centre grounds camping in tents in summer months and preparing the camp with a team shelter, cooking stoves, water storage, and a signal warning alert, a camp security perimeter alert with string and noise cans in case of intruders in the night.

Survival Alert

In small groups your survival tasks will be to design, construct and develop an early warning alert system for your teams survival safety around the shelter camp, all the teams inventions will be assessed and rated on creativity, effectiveness and originality so good luck.

True North

Can your survival team build a water compass to locate the three North's on a compass using a water tub, magnetised needle and a leaf to float the aid and achieve the challenge? Add this with a map of the school grounds and we have a treasure hunt mapping task ahead.

Shadow Dancer

As a small team you will build your very own sun dial to tell the time using the sun and shadow on the marker and the grass, your next task is to transport water from tub to tub over a distance before it pours out to beat the sun dial timer and the other team.

Dr Jones

Your team will use a high tech metal detector to search for lost treasure coins hidden in the school grounds, you need to earn penny coins and then convert them into pound notes using maths, a banker, a safe and team members as your work force to search out and create a surviving enterprise which needs a business name and a plan of action to continue on.

Cash Line

Your task is to design, construct and develop a rope pulley line that cash can be transported across from a security chest to the vault safe, money cannot be dropped as there are penalties. As the challenge develops there will be unforeseen set backs and rewards allowing funds to be earned and lost with job roles and promotions just like a business.

Go Search & Rescue

Team members will dress in camouflage army outfits with special masks hiding their identity from us all, they will hide within the woods in the school grounds ready. The other team will devise a police search line and a plan that needs to be followed, a map needs devising with a grid to mark progress and the AWOL soldiers searched out and recovered as a survival task.

Adventure Simulation

We have learned from experience that if you develop a theme or live scenario and incorporate our activities into this theme, the children engage even more.

Our live motivational team building scenario's are:

- Mountain Rescue
- SAS - Are You Tough Enough?
- Mission Impossible n Radioactive Clean up
- Born Survivor n Adventure Nature Eye Spy
- Nature Trails & Discovery Workshops
- Scavenger Nature Hunts

Adventure Simulations are packed full of team building skill areas and they cover all the activity skill areas listed above.

**Why not
book us for your
Adventure
Sports Day?**

Adventure Activities Summary

- ROCK CLIMBING ■ ABSEILING ■ GORGE WALKING ■ LOW ROPES ■ STREAM SCRAMBLING
- ROCK WEASELING ■ ROCK BOULDERING ■ HILL & MOUNTAIN WALKING ■ NAVIGATION TRAINING
- ZIP WIRE ■ PROBLEM SOLVING ■ SNAKES N LADDERS ■ BIG AIR SWINGS ■ LADDER X-TREME
- LADDER X-TREME ■ ADVENTURE CAVES ■ ADVENTURE WALL-INDOOR & MOBILE
- BUSH CRAFT SURVIVAL ■ ORIENTEERING ■ TREASURE HUNTS ■ ALIEN VS PREDATOR
- LIVE TEAM BUILDING ■ CAMP CRAFT COOKING ■ NIGHT LINES ■ WILDERNESS SURVIVOR
- TREE CLIMBING ■ POSTMAN'S WALK ■ TYROLEAN TRAVERSE ■ MOUNTAINEERING
- ADVENTURE GAMES ■ STEPPING STONE CHALLENGE ■ TARZAN SWINGS ■ HIGH ROPES
- RIVER CROSSING CHALLENGE ■ FIRST AID TRAINING ■ PLUS MORE!

Health & Safety Management Systems

We are government licensed by AALA Adventure Activity Licensing Authority as a provider of adventure activities for children and adults under the Young Persons Safety Act 1995 Regulations 2004. We carry Products/Civil Liability Insurance Cover for £5m and Employer's Liability Cover at £10m.
